Lorena -

Thanks for calling me back yesterday. Per our conversation, Owners' Alliance will move forward with scheduling and paying Dekra-Lite to remove the festoon lighting. Owners' Alliance will then bill Holland.

Holland Superintendent, Mike Bowers, will reach out to Dekra-Lite and help with any scheduling and site logistics.

Holland will be transporting the festoon lighting to our warehouse, address below, and storing the lights for the duration of the project.

Holland Warehouse:

2700 Rose Avenue Suite G

Signal Hill, CA 90755

Please call me with any questions or concerns.

Cody Strange

Lorena and Ryan -

Please move forward with using Derka-Lite to remove the festoon lighting on 6th Street and Palos Verdes. Holland will be able to store the material at our warehouse.

When Derka-Lite sets a date, Holland will be able to coordinate transportation to the warehouse as well. Can Holland Lead Superintendent, Mike Bowers, reach out to Frank at Derka-Lite and discuss coordination?

Lorena - please give me a call when you get a chance to discuss billing.

Thanks,

Cody Strange

Ryan,

That would be fabulous if your contractors can do that.

FYI, when I spoke with Dekra-Lite about the process and why it was so costly, he went through the process with me that I wanted to share. He said that they typically do a full street closure, then use two bucket trucks simultaneously to take down each strand.

The other question I would have is where the lights would be stored.

Thank you for your assistance.

Best regards,

Lorena Parker

Lorena,

Thank you for getting this back to us so quickly.

It MAY be more economical to have our subcontractors remove these lights - it appears that these were strung by the PBID and no formal permit or LA city agency needs to be engaged to drop these. Is that correct?

Thanks for the help,

Ryan Guthrie

Good afternoon,

I received the quote from the lighting company to remove and re-install the lighting. See attached.

I need to discuss this with my Board of Directors and our agenda already went out for our meeting next Wednesday.

Any thoughts?

Lorena, ultimately any festoon light that is anchored to a street light surrounding the site needs to be removed so that we can pull the street lights down temporarily.

Good afternoon,

Are you going to need the lights removed from 5th and 6th Streets? What about Palos Verdes?

Lorena,

See email from Ryan Guthrie, from Holland Partners. They will commenced construct activities for the 360-unit apartments at 550 S. Palos Verdes in the next few weeks. To accomodate cranes at the site, some of the street lights along 5th, 6th and Palos Verdes Street will need to be removed, along with the Tivoli lights. Is the BID responsible for the maintenance of the Tivoli lights? Can you assist/coordinate with Ryan on their temporary removal?

Thanks,

David

David,

The 550 PV site will be mobilizing in July (likely with demo starting in July) and then we are off to the races later in summer. This project is slated for construction end of 2019-start of 2020 when we will begin to occupy the building. Attached is a preliminary site plan showing the lanes/sidewalks we are trying to close, and below is a rough idea of the two tower cranes locations and their swing radiuses (bottom of the image is PV street, right of image is 6th, left of image is 5th). We will need to temporarily remove the street lights along our perimeters but the festoon lights currently strung up are attached to these streetlights. All of these items will be in conflict with our crane picking operations. How can we get these festoon lights removed so that we can proceed with temporarily taking down the street lights? Tower cranes likely won't begin erection until end of this year - but it would be great to get this process going as soon as possible.

Thanks for the help,

Ryan Guthrie
